6"

# Paper Boat How-to

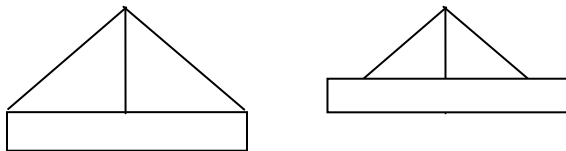

Begin with a 12" sandwich sheet cut in half.

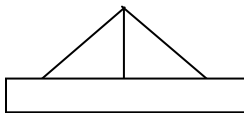

1. Cut sandwich sheet into a 9" x 6" sheet of paper  
Fold in half (9" x 4 1/2")

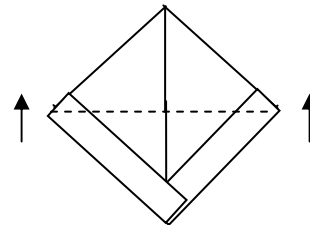

2. Mark middle and fold the two top corners in so they meet in the center.

3. Fold one flap up. Flip over. Fold last flap up.

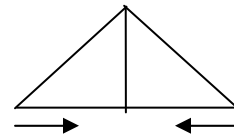

4. From the bottom open up insides, so sides meet.  
You will create a diamond shape (see #5)

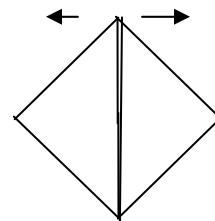

6. Fold the bottom corner to meet the top corner.  
Flip over and do the same with the other side.

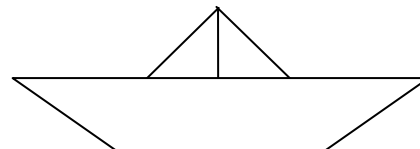

You should end up with a open bottom triangle.

7. From the open bottom, bring bottom corners together.

8. From the top - Pull open the top layers out to form hull for boat. Now you have a complete boat!
