German Bell Instructions

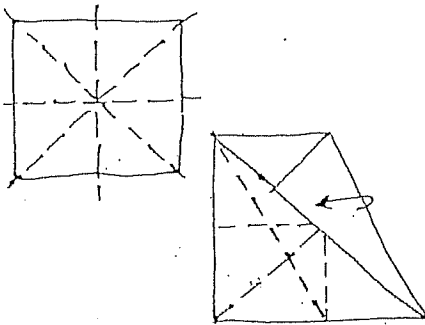

Cut a 20" square piece of paper

Fold square in half, then in half again. Open square.

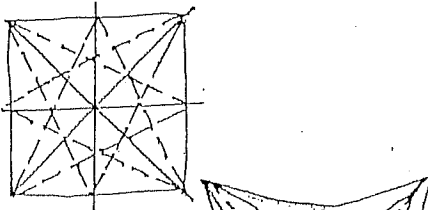

Fold diagonally, corner to corner, then repeat for remaining corners.

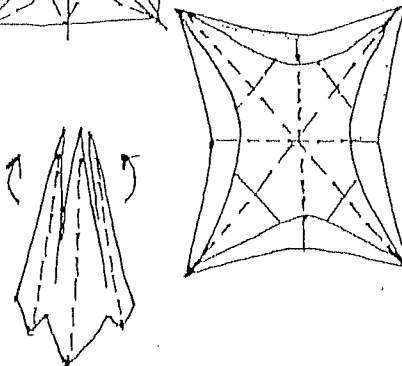

Open square again.

Pick up one corner and line up with the diagonal fold, open square. Continue with remaining 3 corners and then repeat with the 4 corners in the opposite direction.

Bring 4 points together and tuck the 4 sides inwards. Voila, your German bell is formed. With a bar punch, punch each of the 4 points with 2 horizontal holes (wide enough for a 1/4 to 3/8" length of ribbon).

Using 6 inches of wax twine, thread through all four holes and tie together. Attach 4 pieces of 18" leaf ribbon with the wax twine, to create the vines.

Tip: You may want to gather and tack the inside of 2 folds of bell with double stick tape or glue to make container.
